House Bill 5341 (As Introduced)

Topic: Carbon Monoxide Detectors
Sponsor: Representative McDowell
Co-sponsors: Representatives Miller, Meadows, Young, Gonzales, Lahti, Lindberg, Hood, Cushingberry, Byrnes, Gaffney, Amos, and Ball
Committee: House Regulatory Reform

Date Introduced: October 23, 2007

Date of Summary: October 31, 2007

The bill adds a new section to the Stille-DeRossett-Hale Single State Construction Code Act to require installation of carbon monoxide detectors in new residential buildings or structures. The Department of Labor & Economic Growth would be required to promulgate rules establishing standards and requirements for installation of alarms. The installation requirements would be incorporated in future versions of the Michigan Building Code. Until the rules become effective, the bill requires builders to install at least one alarm in all new residential buildings or structures, beginning one year after the effective date.
